

Specialized dumping truck AC-4700

Specialized dumping truck AC-4700 with removable platform (car body served as a container) is used for shipping, transportation unshipping of different cargos. The plant also produces removable car bodies (with cover or without cover). The dumping car can serve up to 20-30 carbody-containers.

MAIN TECHNICAL CHARACTERISTICS

1. Basic truck chassis.	ЗИЛ-433362
2. derive	hydraulic
3. Power takeoff of the hydraulic drive	mechanical, single power takeoff with drive from reverse pinion of layshaft unitized with the pump
4. Power takeoff controlling	Electropneumatic, remote from driver's car
5. Outriggers (remote feet)	piston type hydraulic cylinder, double sided operation
6. Jib	portal type, metal, welded
7. Platform (carbody-container)	removable metal, welded
8. Platform capacity, m ³	8
9. Unequipped dumping truck mass, kg	6120
10. Fully loaded mass of the dumping truck incl. transported cargo mass (with a driver and two passengers), kg	11200
11. Test fuel consumption l/100 km at the speed not more than 60 km/h	28,3
12. Total dimensions, mm in over-the-road position:	
- length	6300
- width	2500
- height	2700
13. Transported cargo mass, kg	4700
