

Removable platform (body-container)

Removable platform of the body-container is used for rubbish, scrap metal, hard domestic waste gathering.

There are two types of body-containers produced by the plant: with cover (on the upper part there are opening hatches for manual rubbish charging and rear opening board - double cover (fig. 1) and without covers (fig. 2).

MAIN TECHNICAL CHARACTERISTICS

1. Platform (body-container)	removable, metal, welded
2. Total dimensions, mm:	
- length	3462
- width	1430
- height	1934
3. Body-container capacity, m ³	8
